SHAHRIAR SRABON

Full-Stack Developer | React, Next.js, Node.js

Dhaka, Bangladesh | [+880 XXXX-XXXXXX] | srabon361@gmail.com
github.com/Srabon-bot | linkedin.com/in/shahriar-hossain-b0589a402 | [your-portfolio-link]

SUMMARY

Final-semester CSE student at UITS who builds full-stack web applications for real, local problems, with machine learning as a supporting strength. Grand prize winner at the [KAIST / WFK] IT Online Training Program as main developer of Lal Khata. Looking for a junior or intern full-stack developer role.

PROJECTS

Lal Khata: Voice-to-Ledger App (Grand Prize Winner) | *TypeScript, Gemma AI*
GitHub: github.com/Srabon-bot/kaist-haalkhata | [Live link]

- Main developer of a voice-to-ledger app that lets local Bangladeshi shopkeepers record ledger entries by speaking.
- Built as a team project in the [KAIST / WFK] IT Online Training Program and won the grand prize in the 2026 project competition.
- [Add one result: users tested with, accuracy, or features you built.]

AquaGuard: Smart Fish Farming Monitoring System (Capstone) | *ESP32, Firebase, FastAPI, scikit-learn*
[GitHub repo link] | [Live link]

- Built a five-tier IoT system: ESP32 sensors (pH, TDS, temperature, water level), Firebase Realtime Database, a FastAPI backend, and a web dashboard.
- Dashboard in HTML, JavaScript and Chart.js with live charts, remote pump override, pH calibration and bilingual (Bangla and English) alerts.
- Trained 3 ML models in the backend: river flood forecasting, pond TDS prediction, and anomaly detection with Isolation Forest.

Yutnori 3D: Korean Board Game | *React Three Fiber, TypeScript*
GitHub: github.com/Srabon-bot/Vibe-coding-project-Korean-game-Yutnori- | [Live link]

- Built a 3D browser version of the traditional Korean board game with pass-and-play and character customization.
- Implemented a full rules engine covering shortcuts, catching, stacking and back-do.

Sholo Guti: Traditional Bangladeshi Board Game | *JavaScript*
GitHub: github.com/Srabon-bot/Sholo-Guti_6_U222_U224_U202 | [Live link]

- Built a digital version of the traditional game as a team project during the KAIST training program. [Add your role and one feature.]

Bangladesh Flood Risk Prediction (4 repositories) | *Python, scikit-learn, TensorFlow, Pandas*
GitHub: github.com/Srabon-bot/Bangladesh-flood-risk-classifier-model

- Built a flood data set, a river discharge forecaster, a flood risk classifier and a flood susceptibility model for Bangladesh.
- [Add one result: best model, accuracy or R-squared.]

SKILLS

Languages: JavaScript, TypeScript, Python, SQL, C, C++
Frontend: React, Next.js, HTML5, CSS3, Tailwind CSS, React Three Fiber, Chart.js
Backend: Node.js, FastAPI, REST APIs
Database and Cloud: Firebase Realtime Database, MySQL, Vercel
Machine Learning: scikit-learn, TensorFlow, PyTorch, Pandas, NumPy, Jupyter
Tools: Git, GitHub, VS Code, Linux

ACHIEVEMENTS AND CERTIFICATES

- Grand Prize, 2026 [KAIST / WFK] IT Online Training Program project competition (Lal Khata)
- [Certificate name, issuer, year]

LEADERSHIP AND ACTIVITIES

- [Club, volunteer or team role, organization, year range, one line on what you did]

EDUCATION

University of Information Technology and Sciences (UITS), Dhaka
Bachelor of Science in Computer Science and Engineering (CSE)
[Start year] to [Expected graduation: Month Year] | CGPA: [X.XX / 4.00]
