SUMMARY

Final-semester CSE student at UITS who builds full-stack web apps with React, Next.js, Node.js, Express and MongoDB for real problems in Bangladesh. Grand Prize winner at the KAIST Student Volunteer Team x UITS WFK IT Online Training Program as main developer of Haal Khata. Also researches machine learning models for flood forecasting. Seeking a junior or intern full-stack developer role.

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, Python, SQL, C, C++
Frontend	React, Next.js, HTML5, CSS3, Tailwind CSS, React Three Fiber
Backend	Node.js, Express, REST APIs, JWT auth, FastAPI
Database and Cloud	MongoDB, Firebase, Vercel, Render
Machine Learning	scikit-learn, LightGBM, TensorFlow, PyTorch, Pandas, NumPy, Jupyter
Tools	Git, GitHub, VS Code, Linux

PROJECTS

Haal Khata | Grand Prize Winner — **Live** · **Code**

Voice-first digital ledger · React 19, TypeScript, Vite, Tailwind CSS

- Led development of a voice-first ledger for neighborhood shopkeepers in Bangladesh, who record entries by speaking in Bangla, English or Korean.
- Built with a team in the KAIST Student Volunteer Team x UITS WFK IT Online Training Program and won the Grand Prize in the 2026 project competition.
- Deployed as a fully working live website on Vercel.

BazarDor — **Live** · **Code**

Commodity price tracker · Next.js, React 19, TypeScript, MongoDB, Tailwind CSS

- Built a responsive grocery and commodity price tracking app for Bangladesh with a Bangla interface.
- Implemented category pages with sorting, a live price ticker, risers and fallers sections, and product detail pages.

FitLog — **Live** · **Code**

Workout library and session planner · Next.js 16, React 19, TypeScript, Tailwind CSS

- Built a dark-themed workout library and daily session planner with real-time session metrics.

Yutnori 3D — **Live** · **Code**

3D Korean board game · React, TypeScript, React Three Fiber, Three.js

- Built a 3D browser version of the traditional game with physics, AI opponents, pass-and-play and multi-language support.
- Implemented a full rules engine covering shortcuts, catching, stacking and back-do.

Bangladesh Flood ML Suite — **Forecaster** · **Classifier** · **Dataset** · **Susceptibility**

4 repositories · Python, LightGBM, scikit-learn, FastAPI, Pandas

- Built a flood dataset, river discharge forecaster, risk classifier and susceptibility model covering 30 river stations across Bangladesh.
- Discharge forecaster reached R^2 0.996 at 24 hours and beat a persistence baseline by 11% to 28% across 24, 48 and 72 hour horizons.
- Risk classifier reached ROC-AUC 0.884 and 85% recall at 24 hours, served through a FastAPI endpoint.

EDUCATION

University of Information Technology and Sciences (UITS), Dhaka — March 2023 to January 2027 (Expected)
B.Sc. in Computer Science and Engineering — CGPA: 3.69 / 4.00 (current)

ACHIEVEMENTS

- Grand Prize, 2026 KAIST Student Volunteer Team x UITS WFK IT Online Training Program project competition (Haal Khata)
